

## South Bersted CE Primary Policy on Medicines in School

Web and/or Internal	Web & Internal
This policy should be reviewed every	Every two years
Policy approved by Governors	Autumn 2019
Date of Review	Autumn 2021
Member of staff responsible	Business Manager
Policy created by	WSCC Model Policy, personalised
Signed by Chair of Governors and/or Headteacher	

### **Statement of Intent**

Section 100 of the Children and Families Act 2014 places a duty on 'governing bodies of maintained schools, proprietors of academies and management committees of PRUs to make arrangements for supporting pupils at their school with medical conditions'. The governing body of South Bersted CE Primary School will ensure that these arrangements fulfil their statutory duties and follow guidance outline in 'Supporting pupils at school with medical conditions' December 2015'.

Medicines will be administered to enable the inclusion of pupils with medical needs, promote regular attendance and minimise the impact on a pupil's ability to learn. In an emergency all teachers and other staff in charge of children have a common law duty of care to act for the health and safety of a child in their care – this might mean giving medicines or medical care.

## **Organisation**

The governing body will develop policies and procedures to ensure the medical needs of pupils at South Bersted CE Primary are managed appropriately. They will be supported with the implementation of these arrangements by the Head teacher and school staff.

The Lead for Managing Medicines at South Bersted CE Primary is **Sandy Osman or in their absence Laura Osborne**. In their duties staff will be guided by their training, this policy and related procedures.

## **Implementation monitoring and review**

All staff, governors, parents/carers and members of the South Bersted CE Primary School community will be made aware of and have access to this policy. This policy will be reviewed bi-annually and its implementation reviewed and as part of the Head teacher's annual report to Governors.

## **Insurance**

Staff who follow the procedures outlined in this policy and who undertake tasks detailed in the RMP Medical Malpractice Treatment Table are covered under WSCC insurance policies. The medical audit is available to view on West Sussex Services for Schools under 'guide to insurance for schools'.

Claims received in respect of medical procedures not covered by the insurers will be considered under the Council's insurance fund.

## **Admissions**

When the school is notified of the admission of a pupil with medical needs an assessment of the pupil's medical needs will be completed, this might include the development of an Individual Health Care Plans (IHP) or Education Health Care Plans (EHC) and require additional staff training. The school will endeavour to put arrangements in place to support that pupil as quickly as possible. However the school may decide (based on risk assessment) to delay the admission of a pupil until sufficient arrangements can be put in place.

## **Pupils with medical needs**

The school will follow Government guidance and develop an IHP or EHC for pupils who:

- Have long term, complex or fluctuating conditions – these will be detailed using Template 1 (Appendix 1)
- Require medication in emergency situations – these will be detailed using Template 2 for mild asthmatics and Templates 3, 4, 5 and 6 for anaphylaxis (Appendix 1).

Parents/guardians should provide the Headteacher with sufficient information about their child's medical condition and treatment or special care needed at school. Arrangements can then be made, between the parents/guardians, Headteacher, school nurse and other relevant health professionals to ensure that the pupil's medical needs are managed well during their time in school. Healthcare plans will be reviewed by the school annually or earlier if there is a change in a pupil's medical condition.

### **All medication**

On no account should a child come to school with medicine if he/she is unwell. Parents may call into the school and administer medicine to their child, or they may request that a member of school staff administers the medicine. If a pupil refuses their medication, they should not be forced, the school will contact the parent/guardian and if necessary the emergency services. Pupils should not bring any medication to school for self-administration.

All medication must be supplied by the parent/guardian in the original pharmacist's container clearly labelled and include details of possible side effects e.g. manufacturer's instructions and/or patient information leaflet (PIL). Medicines must be delivered to the school office with the appropriate consent form Template C and/or C1 (Appendix 2). The school will inform the parent/guardian of the time and dose of any medication administered at the end of each day via the handing over of a signed copy of Template D (Appendix 2).

### **Confidentiality**

As required by the Data Protection Act 1998, school staff should treat medical information confidentially. Staff will consult with the parent, or the pupil if appropriate, as to who else should have access to records and other information about the pupil's medical needs and this should be recorded on the IHP or EHC. It is expected that staff with contact to a pupil with medical needs will as a minimum be informed of the pupil's condition and know how to respond in a medical emergency.

### **Consent to administer medication**

Parental/guardian consent to administer medication will be required as follows:

- **Prescribed and non-prescribed medication** - each request to administer medication must be accompanied by 'Parental consent to administer medication form (Appendix 2 Template C and/or C1) or if applicable on the IHP)

### **Prescription Medicines**

Medicine should only be brought to school when it is essential to administer it during the school day. In the vast majority of cases, doses of medicine can be arranged around the school day thus avoiding the need for medicine in school. Antibiotics for example are usually taken three times a day, so can be given with breakfast, on getting home from school and then at bedtime. Administration will be recorded using Template D or E and the parent/guardian informed.

Parents/guardians are expected to remove any remaining medicine from school once the prescribed course has been completed.

### **Non-prescription Medicines**

Under exceptional circumstances, where it is deemed that their administration is required to allow the pupil to remain in school, the school will administer non-prescription medicines. The school will not administer alternative treatments i.e. homeopathic or herbal potions, pills or tinctures or nutrition supplements unless prescribed or recommended by a Doctor and detailed on an IHP or EHC as part of a wider treatment protocol. As recommended by the Government in Supporting Pupils at School with Medical Conditions December 2015 the school will also not administer aspirin unless prescribed. The storage and administration for non-prescription medication will be treated as prescription medicines.

If the relevant symptoms develop during the school day the school will administer non-prescription medications:

Non-prescription medications will only be administered by staff, providing:

- The parent/guardian confirms daily the time the medication was last administered and this is recorded on Template C1 (Appendix 2);
- medication is licensed as suitable for the pupil's age;
- medication is suitable for the pupil i.e. if a child is asthmatic the medication is suitable for that condition;
- administration is required more than 3 to 4 times per day;
- medication is supplied by the parent or guardian in the original packaging with the manufacturer's instructions and/or (PIL);
- and accompanied by parental/guardian consent Template C and C1 (Appendix 2) and confirmation the medication has been administered previously without adverse effect;

The school will NOT administer non-prescription medication:

- as a preventative, i.e. in case the pupil develops symptoms during the school day;
- if the pupil is taking other prescribed or non-prescribed medication, i.e. only one non-prescription medication will be administered at a time;
- for more than 48 hours – parents will be advised if symptoms persist to contact their Doctor; any requirement for the administration of non-prescription medication for more than 48 hours must be accompanied by a note from the pupils General Practitioner (GP) confirming dose and length of administration. Any request to administer non-prescription medication for more than 48 hours must be approved by the School Nursing Service and a record kept.
- A request to administer the same or a different non-prescription medication that is for the same/initial condition will not be repeated for 2 weeks after the initial episode; and not for more than 2 episodes per term - it will be assumed that the prolonged expression of symptoms requires medical intervention, and parents/guardians will be advised to contact their Doctor.
- Skin creams and lotions will only be administered in accordance with the Schools Intimate Care Policy and procedures.

- Medication that is sucked i.e. coughs sweets or lozenges, will not be administered by the school.
- If parents/guardians have forgotten to administer non-prescription medication that is required before school, parents will be requested to come into school and administer.

### **Short term ad-hoc non-prescribed medication**

Paracetamol and Antihistamine will not be administered on an ad-hoc basis, ONLY the following will be administered following the necessary procedures:

- For travel sickness – medication will be administered if required before educational visits and must be age appropriate and supplied by the parent/guardian in its original packaging with the PIL if available.

Only 1 dose of the above medication suitable to the weight and age of the pupil will be administered during the school day.

### **Asthma**

The school recognises that pupils with asthma need access to relief medication at all times. The school will manage asthma in school as outlined in the Asthma Policy. Pupils with asthma will be required to have an emergency inhaler and a spacer (if prescribed) in school. The school may ask the pupils parent or guardian to provide a second inhaler. Parents are responsible for this medication being in date and the school will communicate with the parents if new medication is required and a record of these communications will be kept. The school inhaler will only be used in an emergency and will always be used with a spacer as outlined in the Asthma Policy. The school will develop IHP's for those pupils with severe asthma, and complete the Individual Protocol for pupils with mild asthma.

### **Anaphylaxis**

Every effort will be made by the school to identify and reduce the potential hazards/ triggers that can cause an allergic reaction to pupils diagnosed with anaphylaxis within the school population. The school trains enough staff to administer auto injectors at all times and that training is renewed annually.

In accordance with the Medicines and Healthcare Products Regulatory Agency (MHRA) advice the school will ask parent/ guardian(s) to provide 2 auto-injectors for school use. Parents are responsible for this medication being in date and the school will communicate with the parents if new medication is required and a record of these communications will be kept.

Some antihistamine medication can cause drowsiness and therefore the school will consider if it is necessary for pupils to avoid any contact hazardous equipment after administration of the medication i.e. P.E. Science, Design and Technology.

## **Mild Allergic Reaction**

If antihistamine is not part of an initial treatment plan and a child requires non-prescription antihistamine to be administered for symptoms of mild allergic reaction (i.e. itchy eyes or skin, rash or/and redness of the skin or eyes), the parent will be called to administer and the pupil will be monitored for signs of further allergic reaction. The school will only administer the school stock antihistamine if advised by emergency services that it should be administered.

## **Hay fever**

Parent(s)/guardian(s) will be expected to administer a dose of antihistamine to their child before school for the treatment of hay fever. The school will not administer antihistamine as a precautionary measure.

## **Severe Allergic Reaction**

Where a GP/Consultant has recommended or prescribed antihistamine as an initial treatment for symptoms of allergic reaction this will be detailed on the pupils IHP. The school will administer 1 standard dose of antihistamine (appropriate to age and weight of the pupil) and it is very important that symptoms are monitored for signs of further allergic reaction. During this time pupils must **NEVER** be left alone and should be observed at all times.

***If symptoms develop or there are any signs of anaphylaxis or if there is any doubt regarding symptoms then if the pupil has been prescribed an adrenaline auto injector it will be administered without delay an ambulance called and the parents informed.***

## **Medical Emergencies**

In a medical emergency, first aid is given, an ambulance is called and parents/carers are notified. Should an emergency situation occur to a pupil who has an IHP or EHC, the emergency procedures detailed in the plan are followed, and a copy of the IHP or EHC is given to the ambulance crew. If applicable the pupil's emergency medication will be administered by trained school staff, if the pupils medication isn't available staff will administer the schools emergency medication with prior parental consent.

In accordance with amendments made to the Human Medicines Regulations 2012 from October 2014 a sufficient number of salbutamol inhaler(s) spacer(s) will be held by the school to cover emergency use. Parents are expected to provide 2 in date auto-injectors for administration to their child, if the school does not hold 2 in date auto-injectors for each pupil then a suitable number of auto-injectors will be purchased for use by the school in an emergency.

Parental consent to administer the 'school inhaler and/or auto-injector' will be gained when the pupil joins the school using Template 2 for asthmatics and Templates 3, 4, 5 and 6 for anaphylaxis (Appendix 1). The school will hold a register of the pupils diagnosed with asthma and/or anaphylaxis, and if parental consent has been given to administer the school medication. The school will be responsible for ensuring the school medication remains in date.

Instructions for calling an ambulance are displayed prominently by the telephone in the school office (Appendix 2 Template G)

### **Controlled Drugs**

The school does not deem a pupil prescribed a controlled drug (as defined by the Misuse of Drugs Act 1971) as competent to carry the medication themselves whilst in school. Controlled drugs will be stored securely in a non-portable locked medicines cabinet in a locked room and only named staff will have access. Controlled drugs for emergency use e.g. midazolam will not be locked away and will be easily accessible. The administration of a controlled drug will be witnessed by a second member of staff and records kept. In addition to the records required for the administration of any medication, a record will be kept of any doses used and the amount of controlled drug stock held in school. (Appendix 2 Templates D and E)

### **Pupils taking their own medication**

For certain long-term medical conditions, it is important for children to learn how to self-administer their medication. Appropriate arrangements for medication should be agreed and documented in the pupil's IHP or EHC and parents should complete the self-administration section of 'Parental consent to administer medication' form (Template C Appendix 1).

### **Storage and Access to Medicines**

All medicines apart from emergency medicines (inhalers, adrenaline auto injector, midazolam etc.) will be kept securely (where access by pupils is restricted). Medicines are always stored in the original pharmacist's container. Pupils are told where their medication is stored and who holds the key and staff will be fully briefed on the procedures for obtaining their medication.

Emergency medicines such as inhalers, adrenaline auto injectors and midazolam must not be locked away. If appropriate certain emergency medication can be held by the pupil, or kept in a clearly identified container in his/her classroom. The school will make an assessment as to the competency of each individual pupil to carry their own medication. Parents will be asked to supply a second adrenaline auto injector and/or asthma inhaler for each child and they will be kept in the First Aid area relevant to the child's Key Stage. Staff must ensure that emergency medication is readily available at all times i.e. during outside P.E. lessons, educational visits and in the event of an unforeseen emergency like a fire.

Medicines that require refrigeration are kept in the **staff room fridge** to which pupil access is restricted, and will be clearly labelled in an airtight container. There are specific arrangements in place for the storage of controlled drugs see page 7.

## **Waste medication**

Where possible staff should take care to prepare medication correctly. If too much medication is drawn into a syringe the remainder (amount above the required dose) should be returned to the bottle before administration. If only a half tablet is administered the remainder should be returned to the bottle or packaging for future administration.

If a course of medication has been completed or medication is date expired it will be returned to the parent/guardian for disposal.

## **Spillages**

A spill must be dealt with as quickly as possible and staff are obliged to take responsibility/follow the guidelines. Spillages will be cleared up following the schools procedures and considering the control of infection. Any spilled medication will be deemed unsuitable for administration and if necessary parents will be asked to provide additional medication.

The school has additional procedures in place for the management of bodily fluids which are detailed below:

### Cleaning up body fluid spills – Universal precautions

- Spills of body fluids: Blood, Faeces, Nasal and Eye Discharges, Saliva and Vomit, must be cleaned up immediately
- Wear disposable gloves. Be careful not to get any of the fluid you are cleaning up in your eyes, nose, mouth or any open sores you may have
- Clean and disinfect any surfaces on which body fluids have been spilled. An effective disinfectant solution is household disinfectant diluted 1 in 10 but it must be used carefully.
- Discard fluid-contaminated material in a plastic bag along with the disposable gloves. The bag must be securely sealed and disposed of.
- Only the mop and bucket marked 'Spillages' must be used to clean up body fluids and should be cleaned in a cleaning equipment sink (not a kitchen sink), rinsed with a disinfecting solution(Shield) and dried.
- Ensure contaminated clothing is hot laundered (minimum 60°C).

If the school holds any cytotoxic drugs, there management will be separately risk assessed and follow Health and Safety Executive (HSE) guidance.

## **Record Keeping – administration of medicines**

For legal reasons records of all medicines administered are kept at the school until the pupil reaches the age of 24. This includes medicines administered by staff during all educational or residential visits. The pupil's parent/ guardian will also be informed if their child has been unwell during the school day and medication has been administered. For record sheets see Appendix 2 Template D and E.

## **Recording Errors and Incidents**

If for whatever reason there is a mistake made in the administration of medication and the pupil is:

- Given the wrong medication
- Given the wrong dose
- Given medication at the wrong time (insufficient intervals between doses)
- Given medication that is out of date
- Or the wrong pupil is given medication

Incidents must be reported to the Schools Senior Management Team who will immediately inform the pupil's parent/guardian. Details of the incident will be recorded locally as part of the schools local arrangements. Local records must include details of what happened, the date, who is responsible and any effect the mistake has caused. Senior Management will investigate the incident and change procedures to prevent reoccurrence if necessary. NB: Incidents that arise from medical conditions that are being well managed by the school do not need to be reported or recorded locally.

## **Staff Training**

The school will ensure a sufficient number of staff complete Managing Medicines in Schools training before they can administer medication to pupils. The school will also ensure that other staff who may occasionally need to administer a medicine are trained in the procedure adopted by the school by the person who has completed the Managing Medicines course. Staff given instruction by the Lead for Medicines MUST complete a competency test and achieve a score of 100% in order to administer medication.

Supply and locum staff will be given appropriate instruction and guidance in order to support the pupils with medical needs in their care. Enough school staff are trained annually to administer an auto-injector and asthma inhaler in an emergency. A record of all training must be maintained to show the date of training for each member of staff and when repeat or refresher training is required.

The school will ensure that the staff who administer medicine for specific chronic conditions are trained to administer those specific medicines, for example, Diabetes (insulin) Epilepsy (midazolam). Training in the administration of these specific medicines is arranged via the school nurse.

### **Educational Visits (Off - site one day)**

Staff will administer prescription medicines to pupils when required during educational visits. Parents should ensure they complete a consent form (Appendix 2 Template C) and supply a sufficient amount of medication in its pharmacist's container. Non-prescription medicines as detailed in this policy can be administered by staff, pupils must not carry non-prescription medication for self-administration.

All staff will be briefed about any emergency procedures needed with reference to pupils where needs are known and copies of care plans will be taken by the responsible person.

### **Residential Visits (overnight stays)**

The school acknowledges the common law 'duty of care' to act like any prudent parent. This extends to the administration of medicines and taking action in an emergency, according to the care plan.

Occasionally it may be necessary to administer non-prescription medicines as described in this policy i.e. antihistamine to pupils suffering from an allergic reaction or paracetamol for acute pain from things like headache, period pain, toothache etc. Parents must give written consent prior to the residential visit and sign to confirm that they have administered the medication without adverse effect.

The school will keep its own supply of the following non-prescription medication paracetamol and antihistamine for administration to pupils during a residential visit and parental consent will be required in order for the school to administer their supply (Appendix 2 Template C and C1). The medication will be stored and administration recorded as for prescription medicines. Pupils should not bring non-prescribed medication on the residential visit for self-administration.

### **Risk assessing medicines management on all off site visits**

Pupils with medical needs shall be included in visits as far as this is reasonably practicable. School staff will discuss any issues with parents and/or health professionals so that extra measures (if appropriate) can be put in place. A copy of the pupils IHP or EHP will be taken on the visit and detail arrangements relating to the management of their medication(s) during the visit should be included in the plan.

If a pupil requires prescribed or non-prescribed medication during visit and an IHP or EHP has not been developed and the management of their medication differs from procedures followed whilst in school, the school will conduct a risk assessment and record their findings.

Travelling abroad – a risk assessment will be developed considering parental and medical advice and documented on the pupils IHP or EHP. If an IHP or EHP has not been developed, the school will record their findings. Best practice would be to translate these documents to the language of the country being visited. The international emergency number should be on the care plan (112 is the EU

number). European Health Insurance Cards (EHIC) should be applied for by parents and supplied to the school prior to travel for all pupils that travel abroad.

The results of risk assessments however they are recorded i.e. IHP, EHP etc. will be communicated to the relevant staff and records kept of this communication.

### **Complaints**

Issues arising from the medical treatment of a pupil whilst in school should in the first instance be directed to the Headteacher. If the issue cannot easily be resolved the Headteacher will inform the Governing Body who will seek resolution.

Appendix 1 – WSCC Care Plan Templates September 2017

Appendix 2 – WSCC Administering Medicines Templates September 2017
